Debit / Credit card number:	Expiry date: ____ / ____ Last 3 digits on signature strip: _____
Type of card: Delta/Maestro/MasterCard/Visa (delete as applicable)	Issue Number: _____ Maestro only (where applicable)
Cardholder's name: Please print exactly as it appears on your card.	Cardholder's signature: Please debit my card with the total amount shown hereon. I agree to perform the obligations set forth by the cardmember's agreement with the card issuer.

Card billing address if different from delivery address:

Postcode: V1/SEL/APRIL2011

FREQUENTLY ASKED QUESTIONS

Before proceeding with an order, please take the time to read through this page to help answer any questions you may have about the product:

- **Is Selectives a 'Flat Pack' range?**

Yes - All items in the Selectives range are supplied flat packed, complete with easy to follow, step by step instructions and hardware.

- **Will you install Selectives for me?**

Unfortunately, as Selectives is a DIY range, we are unable to offer an installation service. However, it is very simple to install and if you do not feel capable of installing the product yourself, a local handyman will easily be able to follow the instructions.

- **What tools do I need to install Selectives?**

All you will need is: a spirit level, tape measure, power drill, Phillips screwdriver, rubber mallet hacksaw, and fine wood saw.

- **What if parts are missing from my pack?**

This is unlikely, but if you do have any missing items from your pack call us on 01622 872 006 and we will get the missing items to you.

- **What is Selectives made from?**

The Selectives range is manufactured primarily from 18mm particle board with a laminate finish in Cherry or White. Doors and drawers are made from MDF with metal handles and knobs. Wire baskets, hang bars and shoe shelves are made from steel.

- **My floor is a bit uneven, can I still use Selectives?**

Although Selectives freestands with brackets to fix to a wall to prevent tipping, even if your floor is uneven, you can still use Selectives. All organisers have adjustable feet that you can use to help level your new closet system!

- **How does the top shelf fix?**

When ordering a top shelf, it will come complete with a colour co-ordinated fixing kit. The fixing kit then fixes to a back wall **and** either the closet organiser and a side wall or two closet organisers. The top shelf then sits within the brackets. This means that if you have to adjust the width of the shelf and make a cut, the cut edge is hidden by the brackets. Please note that for each shelf only one fixing kit is supplied. If you are ordering a shelf to cut down and create two or more shelves, you will need to order additional fixing kits (Item #A40 / A41).

- **The Closet Organiser with the hang bars is too wide for my enclosure, can it be cut down?**

Whilst the actual shelves within the Closet Organiser can **not** be cut, the hang bars can. Simply use a hacksaw to trim the hang bars down to the required size. Do note however that the hang bars are telescopic, so when cutting, be sure to extend the hang bar first. Or just discard one or two of the hang bars and only use the hang bar(s) to one side of the organiser. Top shelves can also be cut with a fine wood saw.

- **The decorative panels on doors and drawers appear to be different in the White compared to Cherry, is this right?**

Yes. In the White finish, the detail on the decorative panels are shallow grooves framing each door / drawer finished with a metal crescent handle. In the Cherry finish, the detail on the decorative panels is more accentuated creating a more obvious feature. They are finished with round metal knobs to the doors and metal crescent handles to the drawers.

- **Can I add to my Selectives closet after installing it?**

Yes you can. You can add doors, drawers, baskets, shoe racks, hang bars, even additional organisers at any point you like. So if your needs change, so can your closet! Note that if installing some accessories, after initial installation, you may need to remove some adjustable shelves within your organisers.

- **How do I keep my new Selectives closet Clean?**

Selectives is easily cleaned with a duster or soft cloth. If removing marks, only use a soft cloth with a household non abrasive cleaner. Selectives is a wood product and should therefore not be exposed to excessive water / liquid.

- **How is Selectives delivered? Do I have to be home to sign for it?**

Yes. Selectives is delivered by carrier and we strongly recommend that you arrange delivery for a day that you will be home so that you can sign for and check that your order is delivered in good condition. Selectives is a heavy product and you may need someone to help when handling it. For all addresses that carry a surcharge for delivery (see overleaf), it is likely your delivery will arrive on a pallet. When delivered like this, the carrier will unload the pallet as near to your door as possible, you will then need to unload the pallet yourself. We will endeavour to arrange a day for delivery with you once your order has been received so that you can plan to be at the delivery address. We will also let you know whether or not your order will be palletised.

HELPFUL TIPS

Before installing your new Selectives wardrobe, please read the following tips designed to help make installation as easy as possible!

- **If ordering the 25 cube insert:**

The cube insert comes flat packed just like everything in the Selectives range. To fit it together you should first build the organiser of which you are going to insert it into, and then slot the upright pieces into position. Don't worry about spacing them initially. Next find the horizontal pieces and slot them into the correct gaps, adjusting the position of the upright pieces as you go. **DO NOT** put the insert together and then try to install it into the organiser, as the insert will be too rigid as one piece to fit into the organiser.

- **When using the corner unit:**

Remember that if you would like to create a corner unit, the same height as the main closet organiser, you must order **TWO** corner units. The corner units will then stack on top of one another, to create full height storage. Please note that the corner unit will fit to either a right or left hand corner. The instructions show how to install either way. The dimensions quoted in the brochure are for a right hand corner installation. If installing this unit to the left, the dimensions will be inverted.

- **After constructing the organisers:**

Remember the closet organisers and stackers are very heavy once assembled, so we recommend that you use the brackets enclosed to fix each unit to the wall properly to prevent tipping. Fixings are suitable for Solid and Plasterboard walls.

- **If using decorative doors:**

Please note that when you first install the doors, they may not appear to meet in the middle, however the hinges are adjustable so simply use a screwdriver to get the position of the doors just right.
