

## Comparing Regular Fix/ Fixed Mount Installation & Adjustable/ ShelfTrack Installation

### Regular Fix/ Fixed Mount

- Mounts to the rear wall and, where available, side walls of enclosure.
- Hardware is a mixture of steel and plastic parts.
- Suitable for use in all storage areas.
- Choice of mid support hardware to suit application.
- Suitable for use with all types of ClosetMaid wire shelving.
- Most economical wire shelving system available on the market.
- Accessories available to add to the system, some require additional fixings.
- Available to order as a pre pack kit, pre designed package, component form or bespoke design.
- Load capacity:  
Solid wall - 15kg per linear 30cm  
Stud wall - 15kg per linear 30cm
- Finish: White

### Adjustable/ ShelfTrack

- Mounts to the rear wall of the enclosure.
- Hardware is made from durable steel.
- System is adjustable horizontally & vertically for maximum flexibility.
- Twin slot track system allows supporting hardware and accessories to be mounted onto the system without any additional fixings, at any time.
- Suitable for use in all storage areas.
- Ideal for growing kids or areas requiring heavy duty capabilities.
- Suitable for use with SuperSlide, CloseMesh & Linen styles of ClosetMaid shelving.
- Available to order as a pre pack kit, pre designed package, component form or bespoke design.
- Load capacity:  
Solid wall - 34kg per linear 30cm  
Stud wall - 30kg per linear 30cm
- Finish: White
